Wear 224 (1999) 287–289

WEAR

Subject Index of Volume 224

Abrasion
The particle size effect in abrasion studied by controlled abrasive surfaces, 118
Accumulated surface displacement
A model for rolling contact failure, 38
Additive
The friction and wear behaviors of *S*-[2-*S*-(2-hydroxylpropyl)benthiazole]dioctyldithiocarbamic acid ester as additive in liquid paraffin, 50
The tribological properties of the heterocyclic compound containing S, N, O, and B as additive in liquid paraffin, 68
Alpha (α)-brass
Solid particle erosion of α-brass with 5 and 25 μm particles at normal incidence, 226
Aluminium
Tribological simulation of aluminium hot extrusion, 216
Atomic force microscopy
An AFM analysis of surface textures of metal sheets caused by sliding with bulk plastic deformation, 73

Blast cleaning
Coating removal from fiber-composites and aluminum using starch media blasting, 22
Borate
The tribological properties of the heterocyclic compound containing S, N, O, and B as additive in liquid paraffin, 68
Boronising
Solid-particle erosion and protective layers for steam turbine blading, 8
Boundary layer
Solid-particle erosion and protective layers for steam turbine blading, 8
Branching of multiple surface cracks
Numerical study of polymer surface wear caused by sliding contact, 141
Brittleness
Erosion of ceramic materials by a sand/water slurry jet, 183
Bulk plastic
An AFM analysis of surface textures of metal sheets caused by sliding with bulk plastic deformation, 73

Carbide
Erosion of thermal spray MCr–Cr_3C_2 cermet coatings, 153
Ceramic disk
Mechanisms of friction and wear of metals against ceramics in vacuum, 274
Ceramics
Effects of elevated temperatures and topographies of worn surfaces on friction and wear of ceramics in vacuum, 165
Erosion of ceramic materials by a sand/water slurry jet, 183
$CN_{0.1}$ coated Si(111)
Effect of coating thickness on friction variations in sliding between $CN_{0.1}$ coated Si(111) and a diamond pin, 113

Coatings, composites, impact
Coating removal from fiber-composites and aluminum using starch media blasting, 22
Coating thickness
Effect of coating thickness on friction variations in sliding between $CN_{0.1}$ coated Si(111) and a diamond pin, 113
Composites
Sliding wear behaviour of zircon particles reinforced ZA-27 alloy composite materials, 89
Concrete
Solid-particle erosion of Portland cement and concrete, 106
Conical spinning contact
Finite element analysis wear simulation of a conical spinning contact considering surface topography, 13
Controlled abrasive surfaces
The particle size effect in abrasion studied by controlled abrasive surfaces, 118
Couple stress
A study of a journal bearing lubricated by fluids with couple stress considering the elasticity of the liner, 194
Crack shielding
Numerical study of polymer surface wear caused by sliding contact, 141
Crack spacing
Numerical study of polymer surface wear caused by sliding contact, 141
Critical temperature
Effects of elevated temperatures and topographies of worn surfaces on friction and wear of ceramics in vacuum, 165
Cutting tools
Diamond coatings on cemented tungsten carbide tools by low-pressure microwave CVD, 245

Deformation mechanism
Solid particle erosion of α-brass with 5 and 25 μm particles at normal incidence, 226
Diamond coatings
Diamond coatings on cemented tungsten carbide tools by low-pressure microwave CVD, 245
Diamond pin
Effect of coating thickness on friction variations in sliding between $CN_{0.1}$ coated Si(111) and a diamond pin, 113

Effect of particle size
Solid particle erosion of α-brass with 5 and 25 μm particles at normal incidence, 226
Elastohydrodynamic effects
A study of a journal bearing lubricated by fluids with couple stress considering the elasticity of the liner, 194
Elevated temperature
Effects of elevated temperatures and topographies of worn surfaces on friction and wear of ceramics in vacuum, 165

Elsevier Science S.A.

Erosion
Erosion of ceramic materials by a sand/water slurry jet, 183
Erosive wear
Solid-particle erosion and protective layers for steam turbine blading, 8

FEA
Finite element analysis wear simulation of a conical spinning contact considering surface topography, 13
Finite element analysis
Wear and friction of PTFE seals, 175
Finite element method
Numerical study of polymer surface wear caused by sliding contact, 141
Fretting
Residual stresses and fretting fatigue, 267
Fretting damage
A comparative study on fretting wear-resistant properties of ion-plated TiN and magnetron-sputtered MoS_2 coatings, 211
Fretting mechanism
A comparative study on fretting wear-resistant properties of ion-plated TiN and magnetron-sputtered MoS_2 coatings, 211
Friction
Origins of friction and wear of the thin metallic layer of metal evaporated magnetic tape, 126
Wear and friction of PTFE seals, 175
Sliding behaviors of a unidirectionally oriented Si_3N_{4W}/Si_3N_4 composite, 202
Friction and wear behaviors
The friction and wear behaviors of *S*-[2-*S*-(2-hydroxylpropyl)benthiazole]dioctyldithiocarbamic acid ester as additive in liquid paraffin, 50
Friction coefficient
Effects of elevated temperatures and topographies of worn surfaces on friction and wear of ceramics in vacuum, 165
Friction measurement
Friction measurement apparatus for sheet metal forming, 1
Friction variations
Effect of coating thickness on friction variations in sliding between $CN_{0.1}$ coated Si(111) and a diamond pin, 113

Hot extrusion
Tribological simulation of aluminium hot extrusion, 216
HVOF cermet coatings
Erosion of thermal spray $MCr–Cr_3C_2$ cermet coatings, 153
Hydrodynamic polishing process
An experimental study on machining rate distribution of hydrodynamic polishing process, 95

Ion beam assisted deposition
Effect of coating thickness on friction variations in sliding between $CN_{0.1}$ coated Si(111) and a diamond pin, 113

Journal bearings
A study of a journal bearing lubricated by fluids with couple stress considering the elasticity of the liner, 194

Light scattering
Characterisation of surface roughness by laser light scattering: diffusely scattered intensity measurement, 236
Lubricant additive
A study of N and S heterocyclic compound as a potential lubricating oil additive, 160
Lubricant thickness
Origins of friction and wear of the thin metallic layer of metal evaporated magnetic tape, 126

Machining rate distribution
An experimental study on machining rate distribution of hydrodynamic polishing process, 95
Material damage
Residual stresses and fretting fatigue, 267
Mechanism
The tribological properties of the heterocyclic compound containing S, N, O, and B as additive in liquid paraffin, 68
2-Mercaptobenzothiazole
The tribological properties of the heterocyclic compound containing S, N, O, and B as additive in liquid paraffin, 68
Metal
An AFM analysis of surface textures of metal sheets caused by sliding with bulk plastic deformation, 73
Metal evaporated tape
Origins of friction and wear of the thin metallic layer of metal evaporated magnetic tape, 126
Metal forming
Friction measurement apparatus for sheet metal forming, 1
Metallic pin
Mechanisms of friction and wear of metals against ceramics in vacuum, 274
Microstructural analysis
Characteristics of residual plastic zone under static and dynamic Vickers indentations, 56
MoS_2 coating
A comparative study on fretting wear-resistant properties of ion-plated TiN and magnetron-sputtered MoS_2 coatings, 211

Normal incidence
Solid particle erosion of α-brass with 5 and 25 μm particles at normal incidence, 226

Paint removal
Coating removal from fiber-composites and aluminum using starch media blasting, 22
Particle size effect
The particle size effect in abrasion studied by controlled abrasive surfaces, 118
Plasticity model
A model for rolling contact failure, 38
Portland cement
Solid-particle erosion of Portland cement and concrete, 106
Propagation of multiple surface cracks
Numerical study of polymer surface wear caused by sliding contact, 141
PTFE seal
Wear and friction of PTFE seals, 175

Ratchetting
A model for rolling contact failure, 38
Residual plastic zone
Characteristics of residual plastic zone under static and dynamic Vickers indentations, 56
Residual stress
A model for rolling contact failure, 38
Residual stresses and fretting fatigue, 267
Rolling contact
A model for rolling contact failure, 38
Roughness parameters
Characterisation of surface roughness by laser light scattering: diffusely scattered intensity measurement, 236

Si_3N_{4W}/Si_3N_4-composite
Sliding behaviors of a unidirectionally oriented Si_3N_{4W}/Si_3N_4 composite, 202

Sliding contact
Numerical study of polymer surface wear caused by sliding contact, 141
Sliding direction
Sliding behaviors of a unidirectionally oriented Si_3N_{4W}/Si_3N_4 composite, 202
Sliding wear
Sliding wear behaviour of zircon particles reinforced ZA-27 alloy composite materials, 89
Slurry jet
Erosion of ceramic materials by a sand/water slurry jet, 183
Solid-particle erosion
Solid-particle erosion of Portland cement and concrete, 106
Solid particle erosion
Solid particle erosion of α-brass with 5 and 25 μm particles at normal incidence, 226
Solid particle erosion (SPE)
Erosion of thermal spray $MCr-Cr_3C_2$ cermet coatings, 153
Steam turbine blading
Solid-particle erosion and protective layers for steam turbine blading, 8
Strain rates
Characteristics of residual plastic zone under static and dynamic Vickers indentations, 56
Stress intensity factor
Numerical study of polymer surface wear caused by sliding contact, 141
Surface analysis
A study of N and S heterocyclic compound as a potential lubricating oil additive, 160
Surface cracking of polymers
Numerical study of polymer surface wear caused by sliding contact, 141
Surface pitting of polymers
Numerical study of polymer surface wear caused by sliding contact, 141
Surface protective film
The friction and wear behaviors of *S*-[2-*S*-(2-hydroxylpropyl)benthiazole]dioctyldithiocarbamic acid ester as additive in liquid paraffin, 50
Surface roughness
Characterisation of surface roughness by laser light scattering: diffusely scattered intensity measurement, 236
Surface texture
Origins of friction and wear of the thin metallic layer of metal evaporated magnetic tape, 126
Surface topography
Finite element analysis wear simulation of a conical spinning contact considering surface topography, 13
Synthesis
The tribological properties of the heterocyclic compound containing S, N, O, and B as additive in liquid paraffin, 68

Test apparatus
Friction measurement apparatus for sheet metal forming, 1
TiN coating
A comparative study on fretting wear-resistant properties of ion-plated TiN and magnetron-sputtered MoS_2 coatings, 211
Topographical analysis
Effects of elevated temperatures and topographies of worn surfaces on friction and wear of ceramics in vacuum, 165
Mechanisms of friction and wear of metals against ceramics in vacuum, 274
Tribological simulation
Tribological simulation of aluminium hot extrusion, 216
Tungsten carbide
Diamond coatings on cemented tungsten carbide tools by low-pressure microwave CVD, 245

Unlubrication
Mechanisms of friction and wear of metals against ceramics in vacuum, 274

Vacuum
Effects of elevated temperatures and topographies of worn surfaces on friction and wear of ceramics in vacuum, 165
Mechanisms of friction and wear of metals against ceramics in vacuum, 274
Vickers indentations
Characteristics of residual plastic zone under static and dynamic Vickers indentations, 56

Wear
Origins of friction and wear of the thin metallic layer of metal evaporated magnetic tape, 126
Wear and friction of PTFE seals, 175
Sliding behaviors of a unidirectionally oriented Si_3N_{4W}/Si_3N_4 composite, 202
Residual stresses and fretting fatigue, 267
Wear debris
A comparative study on fretting wear-resistant properties of ion-plated TiN and magnetron-sputtered MoS_2 coatings, 211
Wear rate
Sliding wear behaviour of zircon particles reinforced ZA-27 alloy composite materials, 89
Wear simulation
Finite element analysis wear simulation of a conical spinning contact considering surface topography, 13
Wear tests
A study of N and S heterocyclic compound as a potential lubricating oil additive, 160
Wheat starch
Coating removal from fiber-composites and aluminum using starch media blasting, 22
Whisker grain
Sliding behaviors of a unidirectionally oriented Si_3N_{4W}/Si_3N_4 composite, 202

XPS
The friction and wear behaviors of *S*-[2-*S*-(2-hydroxylpropyl)benthiazole]dioctyldithiocarbamic acid ester as additive in liquid paraffin, 50
The tribological properties of the heterocyclic compound containing S, N, O, and B as additive in liquid paraffin, 68

ZA-27 alloy
Sliding wear behaviour of zircon particles reinforced ZA-27 alloy composite materials, 89
Zircon
Sliding wear behaviour of zircon particles reinforced ZA-27 alloy composite materials, 89
